

NOTE OF CONVERSATION WITH NORTHANTS HIGHWAYS REGARDING INTENDED INFRASTRUCTURE
AT A5 JUNCTION WITH LONG BUCKBY WHARF.

I have spoken with Northants Highways regarding the intended infrastructure along the A5 at the junction with Long Buckby Wharf and the road leading from the Daventry NE SUE.

The decision on the most appropriate development of the road will be taken after the developers have accumulated data on traffic movements from various locations that have been identified by Highways and many discussions have taken place between them and probably DDC as well. The other committed developments in the area such as Micklewell will also be taken into consideration when deciding upon the requirements for that section of the A5. In other words the data taken from actual movements is the base line to then add projections from future developments and anticipated traffic flows in the area.

It will be the developers who submit a planning application for the intended infrastructure at this location.
